

Submitting a Conference Paper to TII

Conference papers are welcome. However, it is imperative that these papers are significantly revised and updated. Actually, such papers have a better chance of acceptance if their merits were already prescreened at high quality conferences. In the case of IEEE conferences, both the conference paper and the follow-up Transactions paper will be published on IEEE Xplore. Therefore, there is a risk that the same material is published on Xplore twice, so special care should be taken. We would advise authors to change the contents of the paper to the extent that the change of the manuscript title will be well justified. In order to avoid confusion on Xplore please do not use the same title as the conference paper.

1. The conference paper must be cited and it should be explained how the conference paper has been enhanced. The lack of this citation is considered a serious violation of ethics and as a consequence the manuscript must be rejected.
2. In the place of authors' names (under the title) please place the statement "post xxxxxx paper", where xxxxxx could be IECON07, ISIE06, ICIT06, or other abbreviation of a conference.
3. If conference paper is not available on IEEE XPLORE (see <http://iee-ies.org/index.php/pubs/easy-access>) then authors must include the copy of the conference paper together with the manuscript.
4. Instead of repeating theoretical derivations (equations) or experimental results (figures and tables) please try to use references to these results presented already on Xplore. Only the most important results should be repeated. Authors should focus on the new contributions, ideas, or clarifications that resulted after the conference paper was presented.
5. The post conference journal publication should preferably be only 4 pages long with an emphasis on the description of the state-of-the-art with an extensive reference section. Please try not to repeat results from the conference paper, and reference it instead. Under well-justified circumstances, such as extensive new results, longer post conference papers (up to 8 pages) may be acceptable.
6. For paper acceptance in the journal, authors should place their results in the context of published similar results in journal papers of the same scope. For example, a manuscript submitted to TII should be linked to other recent TII papers on the same subject, if this is technically justified.
7. Please consider a slight modification of the title of the journal publication in order to avoid confusion on Xplore and please take special care with abstract so your paper will be noticed, downloaded, and read.
8. In the case of non IEEE conferences, the authors must obtain the appropriate permission for IEEE to republish any repeated fragments and figures. If the conference paper is not available in IEEE Xplore, the authors must provide a copy of the conference paper (added to the end of the manuscript).
9. When preparing your manuscript, please follow the instructions here.
10. Unless you are submitting a manuscript to a specific Special Section, your manuscript type will be "Post Conference Paper", which is what you will choose when using Manuscript Central, found at this link: <http://mc.manuscriptcentral.com/tii>, in Step 1 of the submission process.
